A good example of the benefits that our community has received from the relationship is the "HSLANJ Cares" program. This program provides a variety of resources and services to support the health needs of the community. Through this program, HSLANJ has been able to provide health information, resources, and referrals to individuals in need. The program has been particularly effective in promoting health literacy and improving access to health care services.

HSLANJ has also benefited from its relationship with the New Jersey Hospital Association. This association has provided many opportunities to promote health information and resources to the public. Through its annual conference, HSLANJ has been able to connect with other libraries and organizations, share best practices, and learn about new developments in the field of health information.

In addition to these partnerships, HSLANJ has also been involved in advocacy efforts. In partnership with the Coalition on Library Service to the Handicapped, HSLANJ has been able to raise awareness about the needs of people with disabilities and to advocate for policies that support access to health information.

Looking to the future, HSLANJ is committed to continuing its work in promoting health information and advocating for the needs of the community. With the ongoing challenges of the COVID-19 pandemic, the importance of health information has never been more critical. HSLANJ will continue to work with its partners to ensure that all individuals have access to the information they need to make informed decisions about their health.

During the past ten years, HSLANJ has grown and evolved to meet the changing needs of the community. We are grateful for the support of our members and look forward to continuing our work in the years to come.
December 1995.

December 1995 was a landmark date in the history of AIDS awareness in New Jersey. This year saw the establishment of the AIDS Resource Council of New Jersey, an organization dedicated to providing information and support to those affected by HIV/AIDS.

The council's goal was to ensure that all New Jersey residents had access to the latest information about HIV/AIDS prevention, treatment, and support services. This was achieved through the creation of a comprehensive database of HIV/AIDS resources in New Jersey, which was accessible to all libraries in the state.

New Jersey's libraries became key partners in this endeavor, with the development of a database of HIV/AIDS resources that was available to all libraries in the state. This database included information on local providers of HIV/AIDS services, as well as resources for patients and their families.

The council's success in providing access to this information was a testament to the power of collaboration and community outreach. By working together, libraries and other organizations were able to provide vital information to those in need, thereby improving the quality of life for those affected by HIV/AIDS in New Jersey.

In conclusion, the work of the AIDS Resource Council of New Jersey has been instrumental in raising awareness and providing support to those affected by HIV/AIDS. By working together, libraries and other organizations have been able to provide vital information to those in need, thereby improving the quality of life for those affected by HIV/AIDS in New Jersey.

CORRESPONDING SECRETARY. Two responsibilities: Recounting Secretary and the General Council Committee. The office of Secretary has as its primary duty to
coordinate the work of the various committees and to keep the Board informed of
their activities.

VALUATION AND RECOGNITION COMMITTEE. The need for recognition and
appreciation is one of the most pressing problems facing any organization.

NEW JERSEY HEALTH CARE ADMINISTRATION. This committee has also
been given the task of developing a new mission statement for HSLANJ.

THE PUBLIC RELATIONS COMMITTEE. The Public Relations Committee has
been charged with the responsibility of promoting the HSLANJ activities and
achievements. The committee has prepared a newsletter, which is published
every two months. The newsletter contains information about the activities of
the committee and reports on the progress of the various projects.

NETWORKING TO SUPPORT OUR MEMBERS

The Presidents of the past ten years have worked to make networking a key
element of the HSLANJ program. This has been accomplished through the
formation of the HSLANJ Network, which meets regularly to discuss common
interests and to plan future activities.

The National Library of Medicine's Task Force on the National Library of Medicine's Task Force on Health and Science (NLM) awarded the Association a special recognition for its leadership in improving library services. The Task Force, chaired by James Delo, presented a report to the Association on the importance of library services to health professionals. The report was well received and led to a renewed commitment to improving library services. The Task Force was also responsible for developing a new strategic plan for the NLM, which included a focus on improving access to the NLM's digital resources. The plan was implemented in 1995 and led to significant improvements in the accessibility and usefulness of the NLM's services.
